Software Engineer with experience across the full development lifecycle, from scoping and design to deployment and iteration. I thrive in teams that give engineers genuine ownership and expect them to think beyond the ticket. I'm motivated by hard problems, fast feedback loops, and products that people actually love using.

WORK EXPERIENCE

Software Engineer
Zagreb, Croatia
Oct, 2024 - Present

Mithril   Zagreb, Croatia

- Working in the banking and tax administration sector, developing software solutions that digitalize processes and enhance user experience across digital platforms.
- Leading a dedicated development team and collaborating closely with business management to deliver high-quality, reliable products.
- My responsibilities include architectural decision-making for product development and deployment, as well as aligning technical solutions with business objectives.

Software Engineer
Zagreb, Croatia
Jan, 2024 - Oct, 2024

Code Of Us   Zagreb, Croatia

- Took ownership of both the development and architectural design of web applications, making key decisions around structure, scalability, and maintainability
- Worked closely with Product Owners to deeply understand business goals and user needs before jumping into solutions. Contributed to shaping requirements.

Software Engineer
Zagreb, Croatia
Jul, 2021 - Jan, 2024

Comsysto Reply GmbH   Zagreb, Croatia

- Developed and maintained *Meply*, Reply's internal HR platform, built with React.js, Node.js, GraphQL, and AWS services.
- Responsibilities included maintaining and refactoring the existing codebase, enhancing features, architecting new functionalities, and aligning product development with the business needs of the Reply network.
- Subsequently contributed to *Canyon Bicycles* customer application, focusing on backend development using Node.js, TypeORM, and Azure, integrated with Contentful CMS.

Software Engineer
Zagreb, Croatia
Jul, 2020 - Jul, 2021

Zero Molecule   Zagreb, Croatia

- Started professional career during the final years of university, collaborating with a college professor at his software development startup.
- Participated in several projects for different clients, including my Master's thesis project, gaining experience in agile teamwork and practical software delivery.
- Strengthened technical foundations and learned to operate within dynamic, multidisciplinary teams.
